

Hi all,

For the first class tomorrow, please ensure you watch the 1st video whose link is given above.

For my live sessions, we will be using the MS Teams link that you were clicking on earlier for the live sessions of Prof.Rajakishore Nath and Prof.Aditi Chaubal. I will introduce each day's live session with an introduction and explaining the context for the particular video for about 15-20 minutes. We will then open up for clearing doubts and responding to questions.

On 10 Nov, I will not be taking a class. Instead I would like you to attend an event organized by World Forum of Fisher Peoples, Sustainable Development Foundation and SNEHA-INDIA on **"Indian Ocean People's Tribunal on the Issues and Challenges in the**

context of Blue Economy”. This is a series of events where small scale fishers from different countries in South and South East Asia will present on how they have been adversely impacted by the Blue Economy projects launched by the governments of these countries. This will give you a good chance to observe real or actual cases related to environmental policies, environmental governance, and adverse impacts of particular economic projects on environment and people. This event is from 8.00 AM to 11.30 AM India time, but you may join as per your convenience. The links to this virtual tribunal where judges and researchers will hear the complaints from people affected by the projects and give their verdict, are given below. Agenda for this will be sent separately.
